### Understanding Our Parts

**OEM:** OEM original parts that are the same quality as your original phone screen.

**HQ :** Good balance of quality and price. The difference between this and an original part is very small but the price is a lot more affordable.

**HOLED Screen Parts:** LCD panels are used widely in Aftermarket part manufacture field.

Our **HOLED** part includes OLED panels instead of LCD for higher quality and user experience.

**HOLED** part allows users to experience better colour accuracy and touch interface.
